**Eligible working in Ireland:** Yes (Stamp 4)

## Personal Summary

---

I was born in a family doing estate development. I have started learning design since I were 6. I love design and the happiest moment is when the client praised my work. I have successfully completed 8 commercial design projects and 1 residential design project during my college time and most of my clients are from the recommendations of the previous client. I am a very confident, competent, creative and productive interior designer with extensive experience working on projects both commercial and residential. I work very hard. I am a quick learner and also a very good team player. I am looking for a mid-level interior design position to pursuit my career and embrace the new challenge.
